

TO BUILDERS, CONTRACTORS, AND OTHERS.
CREAVE'S BLUE LIAS LIME and

TO BUILDERS, CONTRACTORS, AND OTHERS.
GRAVE'S BLUE LIAS LIME and
CEMENT, direct from the works, Spookton.—**HUTT** and
VENNY beg to inform the Trade that they continue to supply
 Blue Lias Lime and Cement as usual at No. 1 Wharf, Paddington,
 only. Also Glass Drain Pipes.—N.B. No other lime kept at the
 wharf.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long experience of time, has often proved itself to be one of the best in the world. The new Cement made, the Company will be manufactured in London, and thus presented to consumers in a fresh and genuine state, by the sole Agents, J. & WHITE and ROSS, Millbank street, Westminster.

KEENE'S and **PARIAN CEMENTS**
For internal uses, are employed very advantageously in the place of bricks, shingles, and paved surfaces, and for is-doot flooring, instead of stone. The peculiar properties of **PARIAN CEMENT** allow of the being painted or papered upon within a few hours of its application, and thus render it an important substitute for concrete plastering in those cases where expense and labour of finish are essential. J. B. KEENE & CO., 10 N. MILWAUKEE street, New York, U. S. A., Sole and Exclusive General Licensees of **PARIAN CEMENT**.

PORTLAND CEMENT, as manufactured by J. R. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When laid as a stucco it does not regulate or turn green in damp situations, and requires no colour.

Employed as an hydraulic mortar for brick work, it carries four to five members of men to one of cement, and is proved by trial to become harder and stronger in those proportions than Roman Cement with but one measure of sand. This superior setting mortar, combined with its eminently hydraulic properties, points out as the fittest material for building sea and harbor works, the lining of reservoirs, cisterns, and basins, and for all those purposes where strength and a perfect resistance to water are required.

Messrs. Messrs. J. B. WHITE and SONS, Millbank-street, Westminister, and M. Feni-street, Liverpool.

PORTLAND CEMENT, sole
MANUFACTURED by WILLIAM ASPDIN, Son
the Patentee. — Messrs. ROBIN & CO. require

SAUNDERS of "The Builder," for accounts of EXPERIMENT on the strength of Portland Cement, whereby the great superiority of their "best" is manifest. This cement is not only approved by the Government, but the Thames Tunnel Company, and the action of water is stronger in its concrete than in any other, and more durable than any other description of concrete. It is also the only cement that is not affected by any atmospheric impurities whatever the climate, retaining all the cohesion of fresh and hard. It is manufactured by Messrs. ROBEY & CO., Ltd., of Lincoln, and is available to the Proprietors challenge competition. Orders received by Messrs. ROBEY, ASPIN, and Company, as their Managers, at 10, Abchurch Lane, London, E.C. 4, and at Messrs. Whitehead and Co.'s Depot, at 11, Newar Street, Liverpool.

THE PARIAN CEMENT, for INTERNAL
STUCCO, which you supplied at Messrs J. & K. MORLEY'S
 warehouses and dwelling in Wood-street, Great-street, in the City
 of London, has been used in the construction of a new building
 about ten thousand yards superficial, chiefly upon recently built
 walls, and a small portion upon timber partitions, and that with
 the most perfect and satisfactory results. I feel it a duty to state
 here, that the Master's work was almost entirely followed
 on the next day by the pattern, thereby enabling me to have the
 buildings complete in the shortest possible time, both for business
 and convenience. I have no hesitation in recommending this
 option, and the use of this new material is a most valuable feature
 in building operations, and fully justifies that which I was given
 to understand, viz. that it was an extraordinary material. I think
 it will be found to be a most valuable material for the construction
 of similar work erected at another range of buildings, where time
 and the quality of the work are of the utmost importance.

Yours faithfully,
 J. K. MORLEY, J. & K. MORLEY, Ltd.,
 To Messrs. J. & K. MORLEY, Ltd.,
 15, Abchurch Lane, London, E.C. 4.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT.
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING
IS REQUIRED.

This invaluable Gemcut has not been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is not surprising that the demand for it is increasing. Messrs. STEVENS and SON, however, first called upon to observe that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with Gemcut, for the same purpose, they have increased the quantity of it per cwt. in round full 7 per cent. less in price, with an additional saving in labour of 10 per cent., by its allowing about forty mouses for working, instead of 50 mouses for the same length of time. The result is, therefore, that the use of Gemcut therefore worked with greater facility, makes together the enormous saving of full THIRTY-THREE PER CENT. its advantage is therefore cannot admit of doubt. Experiments, showing the superior quality of Gemcut, for the purpose of cutting and polishing diamonds, may be seen; and the Gemcut, in any quantity, obtained of Messrs. STEVENS and SON, at their Master and Gemcut Works, 108, Abchurch Lane, London, E.C.4, will receive payment in full, when the completion of the work by the planter.

JOHNS and **CO.'S PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.**—The attention of the trade and the public generally is solicited to three very excellent and well-known materials, which, for their beauty, durability, imperviousness, and cheapness are unequalled. **THE PERMANENT WASH**, as a substitute for common lime-wash of water colour, is an article which has long been wanting for stucco and decorative work; is of a fine colour, but may be tinted to any other colour desired; is in twenty-four hours will not wash off by the slightest rain, but the common wash, and being a permanent

is admirably adapted for railway stations, union workhouses, schools, barracks, prisons, &c. (One coat is sufficient to cover, with a brush, the surface of the wall, and the surface is then to be polished to the color of the stone.) In addition to price, and its suitability for internal as well as exterior purposes, places it above all other materials of the kind; it has a beautiful appearance, may be painted or prepared in any dark color, and is not subject to decay, or to the action of acids, and may be cleaned with a brush and water. The merits of the PAINT are well known for its application to stone work of all kinds, and external work generally. It is sold in tubs, and may be obtained on application to the Sole Agent, PHILIP HARR, at the Warehouse, 1, Blue-lane, Upper Thames-street. A liberal allowance to wholesale

THOMAS FREEN AND CO. having com-
menced with the ROYAL CEMENT WORKS, a new
and improved PORTLAND CEMENT, BLUE and PLASTER
of PARIS, beg to call the attention of Builders and others to the
very superior quality of these articles, which they are prepared
supply upon the most reasonable terms.
